	Click "View Site" to open a full-screen version.

By the end of this module, teachers should be able to:

- Label the College and Career Readiness, also known as CCR, anchor standards for Writing
- Explain the structure and organization of the grade-specific Writing standards for Literacy in History/Social Studies, Science and Technical Subjects
- Use the grade-specific Writing standards to identify what students should know and be able to do

[Branching Out: Growing Literacy Skills in Writing:](#)

This is Module 2 of 4 in the series, "Literacy across the Content Areas: Reading and Writing to Build Content Knowledge."

Lesson Plan

Name	Description
Everything is NOT Okeedokee in Okeechobee!:	Students will gain background knowledge and develop a greater understanding of how human impact has affected local waterways. Students will work collaboratively to develop and defend an argument about how urbanization and different types of pollution have resulted in water flow changes from Lake Okeechobee.
Investigate Cell Theory:	This lesson allows students to investigate the Cell Theory.
Spread the Sunshine MEA:	In this MEA, the sun is asking students to provide an advertisement explaining how the sun's energy is used to provide energy every second of every day. Students are asked to provide many examples of how solar energy is transformed into electrical, thermal, and other types of energy. Students are then asked to develop a presentation for the media outlet of their choosing. This MEA can be scaled down for differentiation, or used as is for a challenge to engage students in a rigorous fun activity.
To Divide into Two or Four: That is The Question of Meiosis and Mitosis:	Is it meiosis or mitosis? How does meiosis compare to mitosis? There is no life without cell division. Explore the differences and similarities between these processes to understand how they affect your life!
